To obtain a better understanding of our business, you should read this section in conjunction with other chapters of the Draft Prospectus, including the chapters titled "Our Business" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" and section titled "Financial Information of the Company" beginning on pages 78, 162 and 132 respectively of this Draft Prospectus, together with all other financial information contained in the Draft Prospectus.

The Risk Factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- 1.) *Some risks may not be material individually but may be material when considered collectively.*
- 2.) *Some risks may have material impact qualitatively instead of quantitatively.*
- 3.) *Some risks may not be material at present but may have a material impact in the future.*

INTERNAL RISK FACTORS

- 1) ***There are certain outstanding legal proceedings involving our Company, our Directors our Promoters and Promoter Group Company. Any failure to defend these proceedings successfully may have an adverse effect on our business prospects, financial condition, result of ongoing operations and reputation.***

There are certain outstanding legal proceedings involving our Company, Directors our Promoters and Promoter Group. These legal proceedings are pending at different levels of adjudication before various courts and tribunals. A classification of these legal and other proceedings are given in the following table:	No. of Cases
Company

These legal proceedings are pending at different levels of adjudication before various courts and tribunals. A classification of these legal and other proceedings are given in the following table:	No. of Cases
Material Litigation by Company	1
Promoters	
Litigation involving criminal laws	1
Direct Tax Liabilities	1
Group Entities	
Direct Tax Liabilities	3
Criminal proceeding filed by Group	1

We may incur significant expenses and management time in such legal proceedings. Any adverse ruling in any of the above proceedings or consequent levy of penalties by other statutory authorities may render our Company / Promoters / Promoter Group/Directors liable to penalties and may have a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares. For further details, see chapter titled “*Outstanding Litigations and Material Developments*” beginning on page 175 of this Draft Prospectus.

2) *Our registered office and manufacturing unit is on leasehold land.*

Our registered office and the manufacturing unit at D-3, UPSIDC Industrial Area Jainpur, Kanpur Dehat, Uttar Pradesh from where we operate is not owned by our Company. Our Company has been occupying the registered office and the manufacturing unit on leasehold basis through a deed of lease entered into by our Company with the U.P State Industrial Development Corporation Limited acting through the Regional Manager for a period of 90 years commencing from June 1, 2009 and ending on May 31, 2099. Further, the lease is subject to certain terms and conditions and any non-compliance of the same may lead to the termination of the lease which may have a material adverse effect on our operations and there can be no assurance that the lease will be renewed. In the event the lease is not renewed, we may be required to shift our registered office and manufacturing unit to a new location and there can be no assurance that the arrangement our Company will enter into in respect of the new premises would be on such terms and conditions as the present one.

3) *We have not entered into any agreements with suppliers of milk and an increase in the cost of or a shortfall in the availability of milk could have an adverse effect on our business, results of operations and financial condition.*

All our production processes begin with the procurement of milk and our business operations are dependent on our ability to procure sufficient amounts of quality raw milk at commercially viable prices. We procure the raw milk directly from milk farmers and milk vendors from Kanpur and adjacent areas, which is a significant milk producing region in Uttar Pradesh. Although, we believe we have developed a strong relationship with these dairy farmers and milk vendors over the years, we have not entered into any specific agreement / MoU. We only have oral arrangements with our suppliers and we typically transact on an invoice basis for each order. The availability and price of raw milk is also subject to a number of factors beyond our control including seasonal factors, environmental factors, and general health of cattle and Government policies. For instance, the volume and quality of milk produced by cattle is dependent upon the quality of nourishment provided by the cattle feed and could be adversely affected during extreme weather. Also, any disease or epidemic affecting the health of cattle in India, especially within Kanpur and adjacent area, could significantly affect our ability to procure adequate amounts of raw milk. There can be no assurance that we will be able to procure all of our future raw milk requirements at commercially viable prices, or that we will be able to pass on any increases in the procurement price of raw milk to our customers. Furthermore, in the event that such milk farmers or milk vendors discontinue their supply to us or if we are unable to source quality raw milk from other suppliers at competitive prices, we may not be able to meet our production and sales targets. Interruption of, or a shortage in the supply of, raw milk may result in our inability to operate our production facilities at optimal capacities or at all, leading to a decline in production and sales. An inability to procure sufficient quality raw milk at reasonable

cost, or an inability to pass on any increases in the price of raw milk to our customers could adversely affect our business, results of operations and financial condition.

Recently, we have also entered into a memorandum of understanding with PUM, an organization of Netherland. We believe that through the said Memorandum of Understanding, we will be able to educate farmers about best practices of breeding, feeding, animal management and improving productivity and will establish a much stronger relationships with farmers in the vicinity of our facilities, distributors and institutional customers. Such forerunner step will ultimately result in availability of superior quality milk with us and mitigate the abovementioned risk.

- 4) *Any actual or alleged contamination or deterioration of our products or any negative publicity or media reports related to our products or our raw materials could result in legal liability, damage our reputation and adversely affect our business prospects and consequently our financial performance.***

Since milk is a perishable product, we are subject to risks affecting the dairy industry, including risks posed by the contamination/ spoilage of milk, consumer product liability claims, product tampering, product labelling errors, and other adulteration of our products. Any actual or alleged contamination or deterioration of our products, whether deliberate or accidental, could result in legal liability, damage to our reputation and may adversely affect our business prospects and consequently our financial performance. The risk of contamination or deterioration exists at each stage of the production cycle, including during the production, storage and delivery of raw materials, packaging, storage and delivery to our customers and the storage and shelving of our products by our distributors, institutional customers and retailers until final consumption. While we follow stringent quality control processes and quality standards at each stage of the production cycle, there can be no assurance that our products will not be contaminated or suffer deterioration. Further, there can be no assurance that contamination of our raw materials or products will not occur during the transportation, production, distribution and sales processes due to reasons unknown to us or beyond our control. If our products or raw materials are found to be spoilt, contaminated, tampered with, incorrectly labelled or reported to be associated with any such incidents, we may be forced to recall our products from the market and we could incur criminal or civil liability for any damage resulting from consumption of such products. We generate majority of our sales from institutional customers and if the end products manufactured by those customers are found to be contaminated on account of our product, our customers may return our goods, terminate their relationships with us and initiate legal proceedings against us. Any such event may have a material adverse effect on our reputation, business, financial condition, cash flows, results of operations and prospects could be materially and adversely affected.

- 5) *Our Company is dependent on third party transportation for the delivery of raw materials/ finished product and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations.***

Our Company uses third party transportation for the delivery of our raw materials and finished products. Though our business has not experienced any disruptions due to transportation strikes in the past, any future transportation strikes may have an adverse effect on our business. These transportation facilities may not be adequate to support our existing and future operations. In addition, raw materials / finished products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delays in delivery of products which may also affect our business and results of operation negatively. An increase in the freight costs or unavailability of freight for transportation of our raw materials may have an adverse effect on our business and results of operations. Further, disruptions of transportation services due to weather-related problems, strikes, lock-outs, inadequacies in road infrastructure and port facilities, or other events could impair ability to procure raw materials on time. Any such disruptions could materially and adversely affect our business, financial condition and results of operations.

- 6) *We are dependent on our Directors, senior management and key personnel of our Company for success whose loss could impair the ability to continue to manage and expand business efficiently.***

Our Directors, senior management and key managerial personnel collectively have many years of experience in the industry and are difficult to replace. They provide expertise which enables us to make well informed

decisions in relation to our business and our future prospects. For further details of our Directors and key managerial personnel, see chapter titled "Our Management" beginning on page 108 of this Draft Prospectus. Our success largely depends on the continued services and performance of our management and other key personnel. The loss of service of the Directors and other senior management could impair the ability to continue to manage and expand the business efficiently.

7) *Our revenues depend on the success of our institutional customers and the dairy industry.*

We derive majority of our revenues from the sale of institutional products to institutional customers, belonging to the dairy industry, such as Delhi Milk Scheme, Gujarat Cooperative Milk Marketing Federation (Amul), Parle Group, Sterling Agro Industries Limited, Kwality Dairy Limited etc. In Fiscal 2015, 2016 and 2017 and in the six months ended September 30, 2017, sales of institutional products represented 96.12%, 97.00%, 75.97% and 75.35%, respectively, of our revenues from operations in such periods. In the future, any significant decrease in product spending or outsourcing by customers to which we cater and from which we derive significant revenues, may reduce the demand for our products. Any significant decrease in the growth of the dairy industry or significant consolidation in the same, or any decrease in growth or consolidation in industry segments in which we operate, may reduce the demand for our products leading to adverse effect on our financial results.

8) *Conflicts of interest may arise as our Promoters have promoted some of our promoter group Companies, which are in the similar line of business.*

Our Promoters have interest in our Promoter Group Companies such as, CIMA Dairy and Foods Limited, CIMA Foods Private Limited, Verifresh Dairies Limited, Bhiwadi Milk Products Private Limited. We believe that the promoter group entities of our Company supplements our Company and add to our strength and enable the whole group to offer a wider spectrum of products giving both a competitive edge. However, conflicts may arise in the ordinary course of decision-making by the Promoters or Board of Directors. Conflicts of interests may arise in the Promoters' allocating or addressing business opportunities and strategies among our Company and Promoter Group Companies in circumstances where our respective interests diverge. Further, our Promoter Group Companies have objects similar to that of our Company, however we do not have any non-compete agreement/ arrangement with any of our Promoter Group Companies which could give rise to conflict of interest. In cases of conflict, there can be no assurance that our Promoters will not favour their own interests over those of our Company. Any such present and future conflicts could have an effect on our business, reputation, financial condition and results of operations. For further details, see chapters titled "Our Promoter and Promoter Group" and "Our Group Companies" beginning on pages 120 and 125 respectively of this Draft Prospectus.

9) *We may not be able to sustain effective implementation of our business and growth strategy.*

The success of our business will largely depend on our ability to effectively implement our business and growth strategy. In the past we have generally been successful in execution of our business but there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse effect on our business, financial condition and results of operations.

10) *In past we may not have complied with certain provisions of the Companies Act and we may be subject to regulatory action for such non-compliances.*

The Companies Act 1956 and The Companies Act, 2013 have prescribed certain timelines in connection with filing of documents with the Registrar of Companies. There have been certain instances wherein there has been a delay in filing of forms/compliances with Registrar of Companies. Our Company has made payment of additional charges in the instances of delay as prescribed under the Companies Act. Further, in certain communications made with by third parties to the Company, our Promoter, Mr. Atul Mehra has been referred to as the Managing Director and/or Chairman of our Company. At some instances, our Company has also referred to him as the Managing Director and/or Chairman. However, as on the date of this Draft Prospectus, Mr. Atul Mehra is the Chairman & Whole Time Director.

11) *One of our promoter group entity has defaulted under the financial arrangement entered by it for availing financial facility*

Bhiwadi Milk Products Private Limited ("**Bhiwadi**"), one of our promoter group entity, in which Mr. Atul Mehra is one of the promoter by virtue of his holding in the share capital of Bhiwadi, had obtained certain borrowing from ICICI bank, Jaipur for its business purpose. In addition to mortgage created over its movable and immovable property by Bhiwadi, Mr. Atul Mehra also provided guarantee and pledge his entire holding in Bhiwadi for securing said borrowing. However, Bhiwadi defaulted in the repayment of such borrowing and consequently ICICI bank invoked pledge created by Mr. Atul Mehra on his shareholding in Bhiwadi. The management of Bhiwadi is in the process of negotiating with ICICI bank for the settling the said loan amount. However, if an agreeable settlement is not arrived in between ICICI bank and Bhiwadi, then ICICI bank may invoke legal action against Bhiwadi and/or Mr. Atul Mehra for the repayment. Any such legal proceedings could divert management time and attention and consume financial resources. Further, any adverse outcome in any such proceedings may adversely affect our profitability and reputation and may have an adverse effect on our results of operations and financial condition.

12) *We may not have adequate insurance coverage for protecting us against any material hazards.*

Although we believe that the amount of insurance currently maintained by us is in accordance with industry standards in India. The insurance obtained by us may not provide adequate coverage in certain circumstances and any damage suffered by us in respect of any events that is not covered under any insurance, may have an adverse effect on our business and results.

13) *We require number of approvals, licenses, registrations and permits for our business and are required to comply with certain rules, regulations and conditions to operate our business and failure to obtain, retain or renew such approvals and licences in a timely manner or to comply with the requisite rules, regulations and conditions may adversely affect our operations.*

We require several statutory and regulatory permits, licenses and approvals to operate our business, some of which our Company has either received, applied for or is in the process of application. Many of these approvals are granted for fixed periods of time and need renewal from time to time. While we believe that we will be able to obtain the required permits and approvals as and when required there can be no assurance that the relevant authorities will issue any or all requisite permits or approvals in the time frame anticipated by us, or at all. Non-renewal of the permits and licenses would adversely affect our Company's operations, thereby having a material adverse effect on our business, results of operations and financial condition. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business and financial condition. For further details, see the chapters titled "Key Regulations and Policies" and "Government and Other Key Approvals" on pages no. 95 and 182, respectively, of this Draft Prospectus.

14) *Our Promoter and Directors may have interest in our Company, other than remuneration or reimbursement of expenses incurred.*

Our Promoter and Directors may be deemed to be interested to the extent of the Equity Shares held by them, or their relatives or our Group Entities, and benefits deriving from their directorship and shareholding in our Company. Our Promoter are interested in the transactions entered into between our Company and themselves as well as between our Company and our Group Entities. For further details, see the chapters titled "Our Business" and "Our Promoters and Promoter Group", beginning on page nos. 78 and 120 respectively and "Related Party Transactions" on page no. 158 under the chapter titled "Financial Statements" beginning on page no. 132 of the Draft Prospectus.

15) *We are dependent on one of the Promoter, Mr. Atul Mehra for his expertise and market goodwill. Our separation, if any, from the Promoter may adversely affect our business.*

We are dependent on our Individual Promoter, Mr. Atul Mehra for his expertise and market goodwill and our separation from our Promoter may adversely affect our business. Being a SME company; we have been promoter driven till date. However, we intend to grow and retain services of high quality senior management and become professionally managed. Our separation, if any, with the Promoter, prior to being able to grow and find adequate replacement; for any reasons whatsoever shall adversely affect our business and results of operations.

16) *Our business depends on protection of our intellectual property in our product range. Our ability to compete effectively will be impaired if we are unable to protect our intellectual property rights.*

We believe that our intellectual property is an important asset of our Company. Our intellectual property includes trademarks associated with our business. We use various trademarks and word marks associated with our business including our logo appearing on the cover page of this Draft Prospectus. Our Company does not hold registrations of trademarks in its name, which it uses for its business. Moreover, our Company uses 2 (two) Trademarks i.e. UJJWAL and SIKHAR registered in the name of Mr. Atul Mehra, promoter of the Company and uses the trademark CIMA registered in the name of CIMA Foods Private Limited, through Royalty Agreements. For details of the Royalty Agreements, please see the chapter titled “Our Business” on page 78. However, at times, we may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected.

Also, we have made application for registration of our Company’s logo which is currently pending. There can be no assurance that we will be able to register the logo or, third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill.

Moreover, we also sell our product under the tradename “VERIFRESH”, the registration of which was objected for bearing direct reference to the character, quality of the products. In addition, we also use the tradename “MITHAI MASTER” which is presently objected by third parties. Although we have submitted our reply for the same, we may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed.

As such, with respect to our Company’s logo, VERIFRESH and MITHAI MASTER do not enjoy the statutory protections accorded to a registered trademark as on date. Use of such wordmarks by any other person may cause damage to our business prospects, reputation and goodwill.

17) *Stringent food safety, consumer goods, health and safety laws and regulations may result in increased liabilities and increased capital expenditures.*

Our operations are subject to stringent health and safety laws as our products are for human consumption and are therefore subject to various industry specific regulations. We may also be subject to additional regulatory requirements due to changes in governmental policies. Further, we may also incur additional costs and liabilities related to compliance with these laws and regulations that are an inherent part of our business. We are subject to various central, state and local food safety, consumer goods, health and safety and other laws and regulations. These laws and regulations are increasingly becoming stringent and may in the future create substantial compliance or remediation liabilities and costs. These laws may impose liability for non-compliance, regardless of fault. Other laws may require us to investigate and remediate contamination at our facilities and production processes. While we intend to comply with applicable regulatory requirements, it is possible that such compliance may prove restrictive, costly and onerous and an inability to comply with such regulatory requirement may attract penalty. For details see, “Government and Other Approvals” beginning on page 182 of this Draft Prospectus.

As a result, our Promoter, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company. In addition, our Promoter will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

- 19) *We have included names of few of our institutional customers in this prospectus without obtaining consents from the respective Customers.***

We have a long standing relation with our customers and have served them over the period of time and has developed trust. We are in process of informing our customers orally of our intention to include their name in the draft prospectus. While our Company intends to obtain all the necessary consents from the customers in relation to inclusion of their name prior to the filing of the Prospectus with the RoC. However, inclusion of their name in this Draft Prospectus without obtaining their consents may arise a conflict with the existing customer which may ultimately adversely affect our business.

- 20) *We have in the past entered into related party transactions and shall continue to do so in the future.***

Our Company has entered into various related party transactions with our Promoters, members of the Promoter Group, Directors, and Group Companies. While we believe that all such transactions are conducted on an arms-length basis, there can be no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations. For details of transactions entered by us, see chapter titled "Related Party Transactions" beginning on page 158 of this Draft Prospectus.

- 21) *Debt facilities availed by our Company have been secured on personal guarantees of our Promoters. Our Promoters, Mr. Atul Mehra and Mrs. Sonia Mehra have provided personal guarantees to secure existing borrowings which are still continuing and are in force as on the date of filing this Draft Prospectus. We may continue to provide such guarantees and other security post listing. In case of a default under our loan agreements, any of the personal guarantees provided by our Directors may be invoked which could negatively impact the Company and the said Promoters. Also, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse effect on our financial condition, business, results of operations and prospects and would negatively impact our reputation. We may also not be successful in procuring alternate guarantees/ alternate security satisfactory to the lenders, as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details regarding loans availed by our Company, see chapter titled "Statement of Financial Indebtedness" beginning on page 167 of this Draft Prospectus.

- 22) *Our future expansion plans are subject to the risk of cost and time overrun, which may have a material adverse effect on our business, results of operations and financial condition.***

Our future expansion plans may be subject to delays and other risks, including, among other things,

performance shortfalls, unforeseen problems, disputes with workers, force majeure events, unanticipated cost increases or changes in scope and delays in obtaining certain property rights and government approvals and consents, any of which could result in delays, cost overruns and/or a breach of the financial covenants imposed by our lenders. While we may seek to minimize the risks from any unanticipated events, it cannot be assured that all potential delays can be mitigated and that we will be able to prevent any cost over-runs and any loss of profits resulting from such delays, shortfalls and disruptions.

23) *If we are unable to establish and maintain an effective internal controls and compliance system, our business and reputation could be materially and adversely affected.*

We take steps to establish and maintain compliance and disclosure procedures, systems and controls, and to maintain internal controls over financial reporting in order to produce reliable financial reports and prevent financial fraud. However, internal controls over financial reporting must be reviewed on an ongoing basis as risks evolve, and the processes to maintain such internal controls involve human diligence and compliance and are subject to lapses in judgment and breakdowns resulting from human error. To the extent that there are lapses in judgment or breakdowns resulting from human error, the accuracy of our financial reporting could be affected which may adversely affect our business and financial position of our company.

24) *The shortage or non-availability of power and water supply may adversely affect the production process and storage of our product and our performance.*

Our business processes requires power and water, mainly uninterrupted. Even though we have an operating history of more than a decade; and have been able to manage uninterrupted supply of power and water by installing our own diesel generators and tube wells and reverse osmosis system within our production facilities in addition to the routine sources of power and water. Any changes in government policies or local power and water shortages could adversely affect our production facility and ultimately our operations or financial condition may be adversely affected.

25) *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including termination of our contracts, regulatory sanctions and serious harm to our reputation. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

26) *Our results of operations could be adversely affected by strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees.*

Our business activities require skilled and unskilled labour. Non-availability of labour at any time or any disputes with them may affect our production schedule and timely delivery of our products to customers which may adversely affect our business and result of operations. We are unable to assure you that we will not experience disruptions to our operations due to disputes or other problems with our work force, which may lead to strikes, lock- outs or increased wage demands. Such issues could have adverse effect on our business, and results of operations.

27) *There is no monitoring agency appointed by our Company to monitor the utilization of the Offer proceeds.*

As per SEBI (ICDR) Regulations as amended, appointment of monitoring agency is required only for Offer size above ₹10,000.00 Lakhs. However, the Audit Committee of our Board will monitor the utilization of Offer proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Offer proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

28) *We require substantial financing for our business operations and the failure to obtain additional financing on terms commercially acceptable to us may adversely affect our ability to grow and our future profitability.*

We operate in an industry, which requires substantial levels of funding. We will continue to incur significant expenditure in maintaining and growing our existing infrastructure. The actual amount and timing of our future capital requirements may differ from estimates as a result of, among other things, unforeseen delays or cost overruns in developing our services, changes in business plans due to prevailing economic conditions, unanticipated expenses and regulatory changes. To the extent our planned expenditure requirements exceed our available resources, we will be required to seek additional debt or equity financing. Additional debt financing could increase our interest costs and require us to comply with additional restrictive covenants in our financing agreements. Additional equity financing could dilute our earnings per Equity Share and your interest in the Company, and could adversely impact our Equity Share price.

Our ability to obtain additional financing on favorable terms, if at all, will depend on a number of factors, including our future financial condition, results of operations and cash flows, the amount and terms of our existing indebtedness, general market conditions and market conditions for financing activities and the economic, political and other conditions in the markets where we operate. We cannot assure you that we will be able to raise additional financing on acceptable terms in a timely manner or at all. Our failure to renew arrangements for existing funding or to obtain additional financing on acceptable terms and in a timely manner could adversely impact our planned capital expenditure, our business, results of operations and financial condition.

For further details, please refer to the chapter titled Financial Information's beginning on page no 132 of this Draft Prospectus.

34) *We do not have long term contracts with our customers and majority of our business on standalone basis comes from purchase orders and failure to procure such orders on a continuous basis could adversely impact our revenues and profitability.*

Substantial portion of our business is operated on the basis of purchase orders instead of long term contracts. We believe that we have satisfactory business relations with our customers and have received continued business from them in the past but there is no certainty that the same will continue in the future, which could materially affect our business, results of operations and financial condition.

35) *Our existing manufacturing facility is geographically located in Kanpur Dehat, Uttar Pradesh and therefore any localized social unrest, natural disaster or breakdown of services or any other natural disaster could have material adverse effect on our business and financial condition.*

Our existing manufacturing facilities are based in Kanpur Dehat, Uttar Pradesh. As a result, any localized social unrest, natural disaster or breakdown of services and utilities in and around Kanpur, Uttar Pradesh could have material adverse effect on our business, financial position and results of operations.

36) *Obsolescence, destruction, theft, breakdowns of our machineries or failures to repair or maintain the same may affect our business, cash flows, financial condition and results of operations.*

Obsolescence, destruction, theft or breakdowns of our major machineries may significantly increase our machineries purchase cost and the depreciation of our plants and machineries, as well as change the way our management estimates the useful life of our plants and machineries. In such cases, we may not be able to acquire new plants or machineries or repair the damaged plants or machineries in time or at all, particularly

where our plants or machineries are not readily available from the market or require services from original machinery manufacturers. Some of our major machineries or parts may be costly to replace or repair. We may experience significant price increases due to supply shortages, inflation, transportation difficulties or unavailability. Such obsolescence, destruction, theft, breakdowns, repair or maintenance failures or price increases may not be adequately covered by the insurance policies availed by our Company and may have an effect our business, cash flows, financial condition and results of operations.

- 37) *In addition to the employees on our rolls, we also engage contract labour which requires us to comply with the applicable regulations, the non-compliance of which, may subject us to penalties which may have adverse financial implications.***

We appoint contractors who in turn engage on-site contract labour for performance of our low skill operations. Any contravention under the Contract Labour (Regulation and Abolition Act), 1970 is punishable with imprisonment for a term which may extend to three months, or with fine which may extend to one thousand rupees, or with both and in the case of a continuing contravention with an additional fine which may extend to one hundred rupees for every day during which such contravention continues after conviction for the first such contravention. We have applied to the Government of Uttar Pradesh for certificate of registration under the Contract Labour (Regulation and Abolition) Act 1970 and the same is pending for approval. If we fail to obtain or renew the contract labour registration in a timely manner, we may be exposed to penalties which may adversely affect our business. For further information pertaining to the application made under the Contract Labour (Regulation and Abolition) Act 1970, please refer to our chapter titled "*Government and Other Approvals*" beginning on page 182 of this Draft Prospectus.

- 38) *The dairy products business in India is evolving rapidly and is highly competitive and an inability to compete effectively with established and new competitors may adversely affect our growth prospects, results of operations and financial condition.***

Demand and supply dynamics are always active in perishable items. The dairy products industry in India is highly competitive, especially the markets for pasteurized milk, skimmed milk etc. These products are experiencing rapid development and increasing competition. We currently compete, and in the future will continue to compete, with large players, as well as regional and local companies in each of the regions in which we operate. Further, the Indian dairy market has historically been dominated by the unorganised sector, which comprises traditional milkmen and vendors. We also compete with large dairy cooperatives that also procure milk from farmers in the regions where we procure milk, and any incentives offered by the Central or State Government to such cooperatives, could benefit such entities, which may in turn adversely affect our business. Further, we cannot assure you that we will be able to retain our existing institutional customers or we cannot assure you that we will be able to compete successfully in the future against our existing or potential competitors or that our business and results of operations will not be adversely affected by increased competition.

- 39) *Third party industry and statistical data in this Draft Prospectus may be incomplete, incorrect or unreliable.***

Neither Lead Manager nor we have independently verified the data obtained from the official and industry publications and other sources referred in this Draft Prospectus and therefore, while we believe them to be true, there can be no assurance that they are complete or reliable. Such data may also be produced on different bases from those used in the industry publications we have referenced. The discussion of matters relating to India, its economy and our industry in this Draft Prospectus are subject to the caveat that the statistical and other data upon which such discussions are based may be incomplete or unreliable. Industry sources and publications are also prepared based on information as of specific dates and may no longer be current or reflect current trends. Industry sources and publications may also base their information on estimates, projections, forecasts and assumptions that may prove to be incorrect. While industry sources take due care and caution while preparing their reports, they do not guarantee the accuracy, adequacy or completeness of the data or report and do not take responsibility for any errors or omissions or for the results obtained from using their data or report. Accordingly, investors should not place undue reliance on, or base their investment decision on this information, see chapter titled "*Industry Overview*" beginning on page 69 of this Draft Prospectus.

- 40) *The purposes for which the proceeds of the Issue are to be utilized have not been appraised by any bank or financial institution. In the event of any upward revision in the estimates, our proposed expenditure would increase which could adversely affect our results of operations, profitability and our ability to effectively implement our business plans.***

We intend to use the proceeds that we receive from the Issue for the purposes described in section "*Objects of the Offer*" beginning on page 59 of the Draft Prospectus. The estimated project cost has not been appraised by any bank or financial institution. The fund requirements are based on management estimates and on current market conditions. In view of the competitive nature of our industry, we may have to revise our management estimates from time to time and consequently our funding requirements may also change. This may result in the rescheduling of our expenditure programmes or increase in our proposed expenditure for our objects and which may adversely affect our results of operations profitability and our ability to effectively implement our business plans. Further, the utilization of the proceeds from the Issue will be monitored by our Board and is not subject to any monitoring by any independent agency.

- 41) *Our company has not carried out any independent appraisal of our working capital requirements. Therefore, if our estimation is not accurate or the assumptions we have taken prove to be not correct, we may be required to raise additional debt on terms that may not be totally favorable to us.***

Our working capital requirements have been assessed based on the management's estimates and the same have not been independently appraised or evaluated by any bank or financial institution. Further, the estimates of our working capital requirement are totally based on the experience of our management. We cannot assure that these estimates may be accurate. If these estimates prove to be wrong, we may be required to raise additional debt, on terms that may not be totally favorable to our Company, which may in turn adversely affect our profitability. For further details, see chapter titled "*Objects of the Offer*" beginning on page 59 of this Draft Prospectus.

- 42) *Our Company has not made any alternate arrangements for meeting our fund requirements for the 'Objects of the Issue'. Further, we have not identified any alternate source of financing the 'Objects of the Issue'. Any shortfall in raising / meeting the same could adversely affect business, operations and financial condition.***

As on date, we have not made any alternate arrangements for meeting our fund requirement for the '*Objects of the Offer*' i.e. modernization and expansion of our unit at D-3, UPSIDC Industrial Area Jainpur, Kanpur Dehat, Uttar Pradesh working capital and general corporate purpose etc. We meet our fund requirements through our bank finance, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our fund requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Offer or any shortfall in the Offer proceeds may delay the implementation schedule and could adversely affect the growth plans. For further details, see chapter titled "*Objects of the Offer*" beginning on page 59 of the Draft Prospectus.

Risks Relating to the Issue and Investments in our Equity Shares

- 43) *We may not declare dividends in the foreseeable future.***

The amount of our future dividend payments, if any, will depend upon various factors including our future earnings, financial condition, cash flows, working capital requirements and capital expenditures. There can be no assurance that we will be able to declare dividends. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on various factors. Accordingly, realization of a gain on shareholder investments will depend on the appreciation of the price of the Equity Shares. There is no guarantee that the Equity shares will appreciate in value.

44) *We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.*

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the Offer Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be adversely affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence adversely affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally, the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

45) *You may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax ("STT"), is paid on the transaction. STT is levied on and collected by a domestic stock exchange on which equity shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, is subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

46) *A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.*

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of us. Under the takeover regulations in India, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although, these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a

potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the Indian takeover regulations.

- 47) *There are certain restrictions on daily movements in the price of the Equity Shares, which may adversely affect shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.***

Subsequent to the Offer, we will be subject to a daily "circuit breaker" imposed by BSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The BSE may not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker will limit the upward and downward movements in the price of the Equity Shares. As a result of imposing circuit limit, no assurance can be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

- 48) *Fluctuations in currency exchange rates may have an adverse impact on the investment in our Equity Shares.***

The exchange rate between the Indian Rupee and the U.S. Dollar has changed substantially in recent years and may fluctuate substantially in the future. Fluctuations in the exchange rate between the U.S. Dollar and the Indian Rupee may affect the value of the investment in our Equity Shares of a person resident outside India. Specifically for persons resident outside India, if there is a change in relative value of the Indian Rupee to the U.S. Dollar, each of the following values will also be affected: the U.S. Dollar equivalent of the Indian Rupee trading price of our Equity Shares in India; the U.S. Dollar equivalent of the proceeds that you would receive upon the sale in India of any of our Equity Shares; and the U.S. Dollar equivalent of cash dividends, if any, on our Equity Shares, which will be paid only in Indian Rupee. You may be unable to convert Indian Rupee proceeds into U.S. Dollars or any other currency or the rate at which any such conversion could occur could fluctuate.

Risks Relating to India /External Risk Factors

- 49) *Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect the financial markets and our business.***

Terrorist attacks, civil unrest and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. In addition, the Asian region has from time to time experienced instances of civil unrest and hostilities among neighboring countries. Hostilities and tensions may occur in the future and on a wider scale. Military activity or terrorist attacks in India may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares. Events of this nature in the future, as well as social and civil unrest within other countries in the world, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

- 50) *Instability in financial markets could materially and adversely affect our results of operations and financial condition.***

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an

outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

51) *Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

52) *Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.*

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in effect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

53) *Political, economic and social changes in India could adversely affect our business.*

Our business, and the market price and liquidity of our Company's shares, may be affected by changes in Government policies, including taxation, social, political, economic or other developments in or affecting India could also adversely affect our business. Since 1991, successive governments have pursued policies of economic liberalization and financial sector reforms including significantly relaxing restrictions on the private sector. In addition, any political instability in India may adversely affect the Indian economy and the Indian securities markets in general, which could also affect the trading price of our Equity Shares.

54) *Our transition to Ind AS or IFRS reporting could have an adverse effect on our reported results of operations or financial condition.*

On January 2, 2015, the Ministry of Corporate Affairs, Government of India (MCA) announced the revised roadmap for the implementation of Ind AS for companies other than banking companies, insurance companies and non-banking finance companies through a press release. On February 16, 2015, the MCA issued the Companies (Indian Accounting Standards) Rules, 2015 (Indian Accounting Standard Rules) to be effective from April 1, 2015. The Indian Accounting Standard Rules provide for voluntary adoption of Ind AS by companies in financial year 2015 and, implementation of Ind AS will be applicable from April 1, 2016 to companies with a net worth of ₹5,000 million or more. Additionally, Ind AS differs in certain respects from IFRS and therefore financial statements prepared under Ind AS may be substantially different from financial statements prepared under IFRS. There can be no assurance that the adoption of Ind AS by our Company will not adversely affect its results of operation or financial condition. Any failure to successfully adopt Ind AS in accordance with the prescribed timelines may have an adverse effect on the financial position and results of operation of our Company.

55) *Our business is dependent on the Indian economy.*

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by center or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. There have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

SECTION III - INTRODUCTION

SUMMARY OF OUR INDUSTRY

Overview of Indian economy

Dairy activities have traditionally been integral to India's rural economy. The country is one of the largest producer of dairy products in the world and almost entire production is consumed by the nation. Despite being the world's largest producer, the dairy sector is by and large in the primitive stage of development and modernization. On the demand side, the situation is buoyant. With the sustained growth of the Indian economy and a consequent rise in the purchasing power during the last two decades, more and more people today are able to afford milk and value added dairy products. This trend is expected to continue with the sector experiencing a robust growth in demand in the short and medium run. If the impediments in the way of growth and development are left unaddressed, India is likely to face a serious supply - demand mismatch and it may gradually turn into a substantial importer of milk and milk products.

The Indian economy expanded 6.3 percent year-on-year in the third quarter of 2017, above a 5.7 percent in the previous quarter which was the lowest in near three years, but below market expectations of a 6.4 percent. Investment and inventories growth rebounded, offsetting a slowdown in both private and public spending. GDP Annual Growth Rate in India averaged 6.12 percent from 1951 until 2017, reaching an all-time high of 11.40% in the first quarter of 2010 and a record low of -5.20 percent in the fourth quarter of 1979.

Milk Production

India continues to be the largest producer of milk in world. Several measures have been initiated by the Government to increase the productivity of livestock, which has resulted in increasing the milk production significantly from the level of 102.6 million tonnes at the end of the Tenth Plan (2006-07) to 127.9 million tonnes at the end of the Eleventh Plan (2011-12). Milk production during 2014-15 and 2015-16 is 146.3 million tonnes and 155.5 million tonnes respectively showing an annual growth of 6.27% per capita availability of milk is around 337 grams per day in 2015-16 production of milk and corresponding growth rate (%) per year from 1985-86 to 2015-16 is shown in chart

Dairy Development

The Dairy sector in India has grown substantially over the years. As a result of prudent policy intervention, India ranks first among the world's milk producing nations, achieving an annual output of 155.49 million tonnes during the year 2015-16 as compared to 146.31 million tonnes during 2014-15 recording a growth rate of 6.27 %. FAO reported 1.8% increase in world milk production from 789 million tonnes in 2014 to 803 million tonnes in 2015. This represents a sustained growth in the availability of milk and milk products for growing population.

Dairying has become an important secondary source of income for millions of rural families and has assumed the most important role in providing employment and income generating opportunities particularly for women and marginal farmers. The per capita availability of milk has reached a level of 337 grams per day during the year 2015-16, which is more than the world average of 299 grams per day in 2015. Most of the milk in the Country is produced by small, marginal farmers and landless laborers. 198 dairy cooperative milk unions have covered about 15.83 million farmers under the ambit of 1,70,992 village level dairy corporative societies have procured an average of 42.55 million kgs per day of milk during the year 2015-16 as compared to 38 million kgs per day in the previous year recording a growth of 12%. The sale of liquid milk by the Cooperative Dairies has reached 32 million liters per day during the year 2015-16 as compared to 31.24 million liters per day registering a growth of 2.7% over the previous year up to March 2016. Overview of Indian economy

Dairy activities have traditionally been integral to India's rural economy. The country is one of the largest producer of dairy products in the world and almost entire production is consumed by the nation. Despite being the world's largest producer, the dairy sector is by and large in the primitive stage of development and modernization. On the demand side, the situation is buoyant. With the sustained growth of the Indian economy and a consequent rise in the purchasing power during the last two decades, more and more people today are able to afford milk and value added dairy products. This trend is expected to continue with the sector experiencing a robust growth in demand in the short and medium run. If the impediments in the way of growth and development are left unaddressed, India is likely to face a serious supply - demand mismatch and it may gradually turn into a substantial importer of milk and milk products.

The Indian economy expanded 6.3 percent year-on-year in the third quarter of 2017, above a 5.7 percent in the previous quarter which was the lowest in near three years, but below market expectations of a 6.4 percent. Investment and inventories growth rebounded, offsetting a slowdown in both private and public spending. GDP Annual Growth Rate in India averaged 6.12 percent from 1951 until 2017, reaching an all-time high of 11.40 percent in the first quarter of 2010 and a record low of -5.20 percent in the fourth quarter of 1979.

Milk Production

India continues to be the largest producer of milk in world. Several measures have been initiated by the Government to increase the productivity of livestock, which has resulted in increasing the milk production significantly from the level of 102.6 million tonnes at the end of the Tenth Plan (2006-07) to 127.9 million tonnes at the end of the Eleventh Plan (2011-12). Milk production during 2014-15 and 2015-16 is 146.3 million tonnes and 155.5 million tonnes respectively showing an annual growth of 6.27% per capita availability of milk is around 337 grams per day in 2015-16 production of milk and corresponding growth rate (%) per year from 1985-86 to 2015-16 is shown in chart

Dairy Development

The Dairy sector in India has grown substantially over the years. As a result of prudent policy intervention, India ranks first among the world's milk producing nations, achieving an annual output of 155.49 million tonnes during the year 2015-16 as compared to 146.31 million tonnes during 2014-15 recording a growth rate of 6.27 %. FAO reported 1.8% increase in world milk production from 789 million tonnes in 2014 to 803 million tonnes in 2015. This represents a sustained growth in the availability of milk and milk products for growing population.

Dairying has become an important secondary source of income for millions of rural families and has assumed the most important role in providing employment and income generating opportunities particularly for women and marginal farmers. The per capita availability of milk has reached a level of 337 grams per day during the year 2015-16, which is more than the world average of 299 grams per day in 2015. Most of the milk in the Country is produced by small, marginal farmers and landless laborers. 198 dairy cooperative milk unions have covered about 15.83 million farmers under the ambit of 1,70,992 village level dairy cooperative societies have procured an average of 42.55 million kgs per day of milk during the year 2015-16 as compared to 38 million kgs per day in the previous year recording a growth of 12%. The sale of liquid milk by the Cooperative Dairies has reached 32 million liters per day during the year 2015-16 as compared to 31.24 million liters per day registering a growth of 2.7% over the previous year up to March 2016. The International Dairy

Since early 2014, international prices for milk and dairy products have been declining continuously. The farm gate price of liquid milk has dropped by almost 50 per cent from a peak of NZ\$ 646 per tonne in April 2014 to NZ\$ 354 per tonne in April 2015 and further to NZ\$ 335 a tonne by March 2016 in New Zealand. A similar trend has also been observed in other major dairy exporting countries.

The average price Free-on-Board (FOB) New Zealand of Skimmed Milk Powder dropped by almost 40 per cent from a peak of US\$ 4,988 per tonne in April 2014 to US\$ 2,894 per tonne in April 2015 and further to US\$ 1,750 a tonne by March 2016. According to the international market report, the world dairy trade of major dairy products other than

Skimmed Milk Powder declined on account of reduced imports by China and the Russian Federation. The surplus liquid milk was channelled into Skimmed Milk Powder and butter production instead of whole milk powder and cheese. An un-conducive world dairy market discouraged the farmers to raise milk production through herd expansion or feeding supplements and the production is estimated to grow by 1.8 per cent from 789 million tonnes in 2014 to 803 million tonnes in 2015.

Structure of the Indian Dairy Industry

The Indian dairy industry is divided into the organized and unorganized segments. As per the Annual Report for FY 17 of Dept. of Animal Husbandry, Dairying & Fisheries, Government of India, co-operatives & private dairies still procure only about 20% of the milk produced in the country, while 34% is sold in the unorganized market and about 46% is consumed locally. However, in most of the developed nations, 90% of the surplus milk is processed through organized sector

As per the Department of Animal Husbandry, Dairying and Fisheries, the organized milk handling is expected to grow from 20% at present to 50% by 2022-23.

Indian Dairy Industry rests on four pillars

The dairy industry in India is broadly built on the four pillars, namely, Rising Demand for milk, Milk Output, Enormous Employment, and Prices.

RISING DEMAND FOR MILK

Demand had been growing because of increasing population on one hand, and increasing prosperity on the other, which made people focus more on nutritional intake. Milk remained one of the primary sources of nutrition in India.

MILK OUTPUT

The Indian agriculture and dairy sector is the veritable life-line of the country's rural economy, and also a key pillar of our nutrition security. With our milk production accounting for 18.5% of the total global milk output, milk holds about 25 % of the total economic value of the total agriculture output in India.

ENORMOUS EMPLOYMENT

The backyard cattle rearing model provided in India which in turns provide livelihood to countless millions. 70 to 75 million households are still dependent on the dairy industry

PRICES

Even though milk prices have kept increasing, it has been done in a planned manner gently and consistently which in turn has ensured that there is little consumer resistance against such price increases.

- Growth in milk production in India outpaced other large milk producing nations such as the United States of America and China, which recorded only 2-3% CAGR during the past five years. However, per capita availability (302 grams/day) in India is significantly low compared with developed countries (831 grams/ day).
- India, projected to be the most populous country over the next decade, will be the world's largest milk producer by 2026 and will account for the biggest increase in wheat production globally, according to a report by the United Nations (UN) and the Organisation for Economic Co-operation and Development (OECD).
- The OECD-FAO Agricultural Outlook 2017-2026—FAO stands for Food and Agriculture Organization—said the world's population will increase from 7.3 to 8.2 billion over the course of the next decade with India and Sub-Saharan Africa accounting for 56% of total population growth.
- India's population will grow from 1.3 billion to 1.5 billion, an increase of almost 150 million. The country will overtake China and is projected to be the most populous country in the world by 2026.
- "Over the course of the outlook period alone, milk production in India will grow 49%; in 2026, India will be the world's largest milk producer, with an output one-third above that of the second largest producer, the European Union (EU)," said the report.

Emerging value-added categories

During the last five to ten years, India has seen dramatic shift towards consumption of value-added products such as cheese, yoghurt, UHT (ultra-heat treatment) milk, flavored milk, and whey. To tap the advantages of the changing consumer food preferences, most organized players are expanding product portfolios in the value-added segment. This segment offers high growth potential and better margins versus the liquid milk and Skimmed Milk Powder (Skimmed Milk Powder) segment.

Opportunities in Indian Dairy Industry

Dairy industry is of crucial importance to India. The country is the world's largest milk producer, accounting for more than 13% of world's total milk production. It is the world's largest consumer of dairy products, consuming almost 100% of its own milk production. Dairy products are a major source of cheap and nutritious food to millions of people in India and the only acceptable source of animal protein for large vegetarian segment of Indian population, particularly among the landless, small and marginal farmers and women. Dairying has been considered as one of the activities aimed at alleviating the poverty and unemployment especially in the rural areas in the rain-fed and drought-prone regions.

Key Areas of Concern in the Dairy Industry

- 1) Competitiveness cost of production, productivity of animals etc.: The demand for quality dairy products is rising and production is also increasing in many developing countries. The countries which are expected to benefit most from any increase in world demand for dairy products are those which have low cost of production. Therefore, in order to increase the competitiveness of Indian dairy industry, efforts should be made to reduce cost of production. Increasing productivity of animals, better health care and breeding facilities and management of dairy animals can reduce the cost of milk production. The Government and dairy industry can play a vital role in this direction.
- 2) Production, processing and marketing infrastructure: If India has to emerge as an exporting country, it is imperative that we should develop proper production, processing and marketing infrastructure, which is capable of meeting international quality requirements. A comprehensive strategy for producing quality and safe dairy products should be formulated with suitable legal backup.
- 3) Focus on buffalo milk based specialty: Dairy industry in India is also unique with regard to availability of large proportion of buffalo milk. Thus, India can focus on buffalo milk based specialty products, like Mozzarella cheese, tailored to meet the needs of the target consumers.
- 4) Import of value-added products and export of lower value products: With the trade liberalisation, despite the attempts of Indian companies to develop their product range, it could well be that in the future, more value-added products will be imported and lower value products will be exported. The industry has to prepare themselves to meet the challenges.

- 5) Provisions of SPS and TBT: At the international level, we have to ensure that provisions of SPS and TBT are based on application of sound scientific principles and should become defacto barriers to trade.

Indian key dairy drivers for success business strategy

The dairy industry growth will be driven by a number of drivers. Four most important growth drivers of the dairy industry are private investment, cold chain development, cooperative investment, and market mechanisms.

“The Indian dairy landscape is vastly different from the international dairy supply chain. In India, millions of small and marginal farmers who own two to three animals constitute the primary suppliers while the average herd size in countries such as New Zealand is more than 300. This means that discrete quantities and varying compositions of milk need to be received across a widely distributed geography and quickly tested, cooled and dispatched to chilling centres and processing plants. The assurance of right price for the right quality to the farmer has been delivered by the deployment of technology to measure and capture the quantity and quality of milk at each collection point. The entire supply chain has to be agile and is supported by technology to monitor quality and temperature and optimize distance travelled. Milk received at dairy plants and at every subsequent stage again needs quality measurement and checks in order to ensure that the product delivered to the consumer is of the highest quality.

SAP is deployed to enable the manufacturing and distribution processes across all the businesses. Mobile ordering and the asset monitoring application have been put in place for our distributors and we are in the process of deploying technology solutions to enhance the retail experience at our booths. SOP processes strongly embedded through dairy drivers systems are essential to strengthen to achieve orchestration across the procurement, manufacturing and distribution processes.”

Growth Drivers

The dairy industry has been growing on average of 4% annually (department of AHD&F) due to some specific growth drivers. Consequently, food processing industry is emerging as sunrise industry in India. Here, the growth drivers are the factors, which shape the industry and induce growth of the dairy sector. However, the present growth drivers are likely to change in future in their strength and effectiveness. Further, there are some other less important growth factors as well. When it comes to the scenario of growth drivers, the extension system and farmers training, considered as an important driver. Market mechanism comes out as most effective and potential driver to steer the growth. The names of the other most influential growth drivers of the sector are cold chain development, private investment, cooperative investment, packaging technologies, R&D and research institutes, food safety, and milk processing technologies.

The consumption of dairy proteins has been increasing in recent years, driven by rising income in emerging markets, growth in ‘gym culture’ and a shift towards foods with functional benefits. The global protein market is projected to grow at a CAGR of 6 per cent to 2018.18 Dairy proteins are often viewed by consumers as the ‘gold standard’ in protein due to their complete amino acid profile, easy digestibility and satiety benefits, and are increasingly used for fitness and weight management. Dairy companies are taking advantage of this trend, adding value to proteins for use in a variety of applications relating to health and nutrition and medicine.

Expansion in the sports nutrition market Dairy plays a key role in sports nutrition, with ingredients such as whey and casein staple components of many product varieties. The sports nutrition market is currently experiencing rapid growth, and is expanding to include more segments, with greater numbers of casual users using the products. This has implications for how the products are marketed. For example, occasional users who are less informed about product attributes are more likely to buy established, trusted brands from traditional outlets.

Challenges to dairy sector from emerging trade regime

The link between trade and food security is complex and the effects are different for different categories and levels. While trade policies are decided at a national level, the effects are felt at the individual level depending on whether the individual is a producer or a consumer, and a little more complex if a producer is also a net consumer. The two key challenges that arise are: a) balancing the interests of producers and consumers, and b) balancing the interests of the nation versus sector.

A) Balancing the interests of producers and consumers

The argument for increased trade is often made that such increased trade benefits producer through higher prices for their produce. While producers benefit from high prices as long as they are able to secure such high prices for their produce, they are adversely affected when prices dip. Such fluctuations in income can affect their food security. On the other hand, high domestic prices fuelled by global trade and price trends can erode the ability of consumers to even maintain their existing levels of consumption and increase the level of food insecurity.

While about half of the India's rural population own milch animals, a much larger proportion of consumers, both rural and urban, purchase milk. As per 66th round of the NSSO, 85% of the population in urban areas and 76 % in rural areas consume milk at home.

At the same time, the ability to purchase and consume milk is limited in a large proportion of households who have little or no access to milk and milk products. According to NSSO data for 2009-10, about 60% of both urban households and rural households report consumption expenditure that is lower than the average monthly expenditure on milk and milk products estimated at about ₹380 for rural households and about ₹560/- for urban households.

The review of structure and trends in trade of Skimmed Milk Powder indicates that the gains from trade are yet to be realised by labour abundant countries like India in a significant manner for a product that is the result of a labour intensive activity. While expert opinion seems to be in favour of trade liberalization to address price volatility and levels, there is some evidence to suggest that an insular approach reduces the effects of volatility at least in some countries. Using bans and providing duty free access on a temporary basis seems to indicate that governments are responding either in anticipation of or as a result of expressed consumer concerns on volatile and/or high prices. In both the cases, a tradeoff is required to be made in favour of either producers or consumers. The challenge is in trying to find a middle path that could help in balancing the interests of producers and consumers, without adversely affecting the interests of the other.

B) Balancing sectoral and national interests

Enhancing and securing a country's economic interests often involve a range of international agreements that could range in scope from a trade and/or investment to a comprehensive economic cooperation agreement, which could cover a large number of sectors (verticals) and areas of cooperation (horizontal). Trade negotiations at various levels – bilateral, plurilateral or multilateral involve a strategy of give and take in order to conclude the agreements. However in the process, it could mean that there are demands from negotiating partners that could adversely affect the interests of a particular sector.

With the Doha round of negotiations for the WTO agreements yet to be concluded, the need to stimulate economic growth through enhanced trade and investment has led to India being involved in negotiations on a number of bilateral/plurilateral/regional free trade/economic cooperation agreements. For the dairy sector, the significant ones are the ones underway with major milk product exporting countries such as the ones with the EU, New Zealand and Australia.

At the national level, the economic interests that are being pursued by India in the proposed Bilateral Trade and Investment Agreement (BTIA) with EU includes jobs and growth in general and favourable changes in regulations such as data security and movement of professionals, which are likely to benefit some key sectors of India (PIB, 2013). On the other hand, producer cooperatives have been arguing that the BTIA is not in the interest of milk producers, as there will be no level playing field, as Indian milk producers will not have protection against the subsidized exports. Further the demands to provide protection for geographical indications in India will prevent Indian dairies from producing products such as cheeses. At the same time there will not be any significant benefit from any reciprocal concessions, as Indian dairies would find it difficult to meet the stringent SPS regulations. (Down to Earth, 2013), (TNN, 2013). Similarly, the Free Trade Agreement (FTA) with New Zealand also poses a challenge in balancing a country's overall interests with the interests of India's dairy sector. (PIB, 2011)

Trade policy measures are instruments that can either promote exports or defend against imports, to pursue national interests. To help understand the kind of orientation a country is adopting with respect to pursuing its national interests, it can be useful to use a matrix with its orientation on import and export on two sides as given below. An attempt has

been made to identify the trade orientation for major dairying countries that are significant in terms of production, trade or both.

		Imports		
		Positive (Low level of tariffs)	Neutral	Negative (High tariff and non-tariff barriers)
Exports	Positive (Export Subsidies)			EU, US
	Neutral	Importing countries like members of ASEAN	NZ, Australia, India	
	Negative (Export Subsidies)			

For the dairy sector, EU and US have an orientation that is negative for imports, on account of significant trade barriers trade (tariff and non-tariff) and positive for exports on account of use of price support and subsidies for production and trade. On the other hand, New Zealand and Australia have a neutral policy on both exports and imports. Even though there have been temporary instances of export bans or duty free access to address short term cyclical trends, India's long term trade orientation for the dairy sector can best be described as neutral for both import and exports, as it does not have any significant barriers to import as well as any subsidies for exports.

Considering that milk in India is produced by millions of smallholder producers, it cannot assume an orientation that is positive for imports, as surges in import can adversely affect the incentive for domestic production and thereby affect the self-sufficiency status that has been achieved and maintained.

It would therefore be advisable to not provide trade liberalization under the FTA being pursued with major dairy exporters such as the EU, New Zealand and Australia. However there would be challenges in balancing the need to promote the country's overall economic interests, with the need to ensure that Indian dairy sector's interests are not adversely affected

Manufacturing Facility

Our Company's manufacturing activities are undertaken at D-3, UPSIDC Industrial Area Jainpur, Kanpur Dehat, Uttar Pradesh which is spread over an area admeasuring around 15078 square meters approximately. Our unit is well equipped with wide range of machineries and other handling equipment to facilitate smooth manufacturing process. Our Company also has additional land bank for expansion, adjoining to the existing manufacturing unit.

Manufacturing Process

The below mentioned flowchart reflects our manufacturing process

The brief manufacturing processes of some of our products are as follows:

Procurement of milk

All our production processes begin with the procurement of milk. We procure the Raw Milk directly from milk farmers and milk vendors from Kanpur and adjacent areas, which is a significant milk producing region in Uttar Pradesh. Our direct procurement model enables us to control costs and ensure quality of the raw milk procured by us. When milk arrives at the collection centre is examined for its Quality, Physical, Chemical as well as microbiological, Hygiene and Quantity. Our milk collection facilities have milk testing equipment and storage facilities, to test, collect and store raw milk at these milk collection facilities before being transported to our production facilities. Such inspections are operated by one or more of our employees before the milk are accepted. Post-demonetisation, the Company relies more on quality approved milk collection vendors than the collection centres in and across our raw milk procurement area. The price at which we purchase the milk is dependent on the quality of milk that is supplied to the milk collection facilities especially the Fat and Milk Solid-not-fat (MSNF) content in the raw milk supplied. Once approved and accepted, the raw milk is transported in specialized milk tanker vehicles to our production facilities.

Screening and testing-

We have strict system in place and in-implementation to ascertain quality control standards for raw milk farmers and suppliers. We conduct screening and testing of the milk procured by us and for this purpose we have our own laboratory consisting of research and development team, which is situated within the premise of our production facility. Tests are conducted for the quality assurance which is based on the twenty six parameters including Fat test, SNF test, Temperature test, Color test, Acidity test, Salt test, Starch test, Sensory Quality of Milk, presence of any adulterants for good hygienic handling practices which in-turn contribute to its Microbiological Quality

Pasteurization

Pasteurization is the next step in Milk processing. Pasteurization means heating every particle of the milk or milk product to a Specific Temperature, holding for a defined duration at this temperature and Cooling below 4° C. The whole process enables destruction of 99.96% of pathogens and making milk safe for direct consumption besides extending its shelf-life to 3-days under refrigeration. We have established facility to undertake continuous Pasteurization Process, known as HTST (High Temperature Short Time) which eliminate involvement of human-touch and in-turn the probability of contamination. It makes the milk safe and healthy. It also improves the storage quality, so that milk and milk products can be stored for longer periods without being spoilt.

Clarification and Standardization

The cold raw milk passes through a centrifugal separator, which spins the milk through a series of conical disks inside an enclosure. A clarifier removes waste, bacteria, and other sediment that may be present in the raw milk. For separation of milk we have installed three machineries, of Alpha Laval make, which has capacity to spin 10000 litres of milk per hour each.

After pasteurization, the milk is standardized as per the prevailing standards by taking in to cream separators for separation of excess cream from whole milk, if required, If the fat is partially removed in a manner that the final product contains 3% Fat, it is called Toned Milk and if the fat is completely removed from milk which leaves fat not more than 0.5%, it is called Skimmed Milk. The skimmed milk and pasteurised toned milk goes through standardization and then are packaged indifferent sizes of pouches for sale. Skim milk contains about 91% water

Homogenization

Homogenization is a mechanical process that breaks the large and uneven Fat globules into smaller uniform size that remain present in true solution and prevent gravity separation of milk in the form of cream layer formation. Homogenization improves viscosity of milk and appearance whiter. Homogenization is being done prior to Pasteurization, so as to prevent milk from deterioration of microbiological quality

Butter

Once pasteurization is done, Milk passes through separators where full cream milk is separated and milk cream is beaten vigorously in a churning cylinder until it thickens naturally into butter. The remaining liquid (buttermilk) is drained off, and the butter is mixed and blended. At this point, salt is sometimes added. The final product is, by regulation, at least 80% fat, about 16% water and 3% milk solids. After being weighed, cut, wrapped and chilled, the butter is delivered to your grocery store, ready for you to add to your favourite foods.

Clarified Butter (Ghee)

Ghee is obtained by clarification of milk fat at high temperature and is an indispensable part of religious and ceremonial rites and is prominent in the hierarchy of Indian dietary. Ghee can be stored for extended periods without refrigeration. The manufacturing process comprises two steps: separation of cream from milk and extraction of ghee from the cream. The cream less milk can be sold as toned milk. Ghee is sold in institutional as well as retail market. In retail market, it sold in different packages such as pouch, jar, tin, bottle, and carton with size starting from 15 grams to 1 kg. In institutional market, ghee is sold in 15kg tins to sweet shops, bakeries, hotels etc.

Milk Condensing and Drying -

During Milk Powder production water is removed by boiling the milk under reduced pressure at low temperature in a process known as evaporation. The resulting concentrated milk is then sprayed in a fine mist into hot air to remove further moisture thus forming a powder.

The left over skimmed milk, on the other side is sent to evaporators for evaporation of its water contents and to get its powder form through spray driers or roller driers. One purpose of drying milk is to preserve it. Milk powder has a far longer shelf life than liquid milk and does not need to be refrigerated, due to its low moisture content

Paneer and Peda-

We also produce cottage cheese that is Paneer and Peda which an Indian sweet as per the demand of the institutional customer's.

UTILITIES:

Raw Materials:

The Raw Material for our Company is Raw Milk, which is procured directly from milk farmers and milk vendors from Kanpur and adjacent areas, which is a significant milk producing region in Uttar Pradesh. Our direct procurement model enables us to control costs and ensure quality of the raw milk procured by us. The price at which we purchase the milk is dependent on the quality of milk that is supplied to the milk collection facilities especially the Fat and Milk Solid-not-fat (MSNF) content in the raw milk supplied. Once approved and accepted, the raw milk is transported in specialized milk tanker vehicles to our production facilities.

Power

Our manufacturing operations require a significant amount of power and we also require power to refrigerate and store our products at low temperatures. We depend on state electricity supply for our power requirements which is estimated at 380 KVA and we use diesel generators to meet exigencies to ensure that our facilities are operational during power failures.

Water

We source our water requirements which is estimated at 2,00,000 litres per day, from borewells and water tankers. In addition, water plays a vital role in relation to our production processes. To ensure adequate supply of water, tube wells have been installed within our production facilities for supply of water in addition to the routine sources of water, and we have established a Reverse Osmosis system which filters 5000 litres per hour to treat impurities in the water by removing bacteria, harmful minerals and other impurities.

Packaging

The products are pumped into plastic pouches, tins and cartoons as per the quantity and are sealed. The products are stamped with a "best before within" date to ensure that the retailers do not allow the milk, butter, ghee and milk powder to stay on their shelves longer than it can be safely stored. The packets and tins are placed in protective shipping containers and kept refrigerated. Further, we ensure that the products are packaged under supervision, and in accordance with our internal policies as well as policies and regulations provided by the Food Safety and Standards Authority of India (FSSAI). They are shipped to distribution warehouses in refrigerated trailers and then on to the individual markets, where they are kept in refrigerated display cases.

Competitive Strengths.

We believe we have the following competitive strengths:

Milk procurement system

In order to meet the milk requirement for manufacturing operations, we procure good quality milk from different quality approved milk collection vendors. We believe that maintaining good relationships and creating awareness among milk farmers and other milk vendors is essential to increasing our milk procurement. Currently, our Company is situated in one of the largest milk producer state of India. The production volume of our products is dependent upon the amount and quality of raw milk that we are able to procure. There is tremendous scope to process fresh milk which would need incremental investments in chilling centres, farmers' education, bulk milk coolers and capacity enhancement.

Diversified product portfolio.

Starting from Raw milk we make several value added products like skimmed milk powder, butter, ghee, dairy whitener, liquid milk, concentrated skimmed milk, gulab jamun mix and other sweets. This enables us to take advantage of the best value a given product can give at given time. Our product portfolio includes a range of retail consumer products as well as specialty ingredient products and co-manufactured products even for institutional customers. We offer a diverse portfolio of consumer products targeted at various consumer segments along with Institutional products and this, we believe, enables us to cater to the changing preferences of our retail customers.

For inter-State transactions and imported goods or services, an Integrated GST (IGST) is levied by the Central Government. Finance Cost:

The Finance Cost has increased from ₹442.63 Lakhs in FY 2015-2016 to ₹476.90 Lakhs in FY 2016-2017. The Increase is due to change in policies whereby we have shifted our focus from retail customers to institutional customers for which we have to give them extra credit facilities.

Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Foreign investment is allowed up to 26% under automatic route in our Company. India's current Foreign Direct Investment ("FDI") Policy issued by the Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, GoI ("DIPP") by circular of 2016 with effect from June 07, 2016 ("Circular of 2016"), consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP.
